Ref.: T 4/9.3:AP-MET0075/09

15 December 2009

Subject: ACC AFTN addresses for reception of
radioactive cloud information from VAAC London

Action Req'd: Request for ACC AFTN addresses
as soon as practicable, but not later than **1 February 2010**

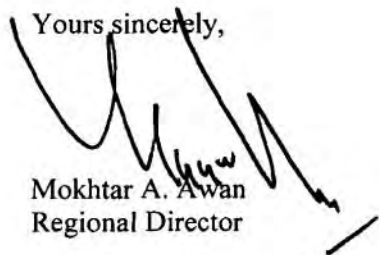

Dear Sir/Madam,

I have the pleasure to draw your attention to the Thirteenth Meeting of Communications, Navigation, and Surveillance/Meteorology Sub-Group (CNS/MET SG/13) of APANPIRG held in Bangkok, Thailand from 20-24 July 2009. Reference is made to a section of paragraph 10.3.17 of the final report and reproduced for your kind information.

The meeting noted that at the present time the radioactive cloud information was sent by the International Atomic Energy Agency in Vienna, Austria to 1) VAAC London for further dissemination to ACCs and 2) to WMO Regional Specialized Meteorological Centres (RSMC) for further distribution to MWOs (through national meteorological centres). The notification of ACCs would be applicable in 2010.

In order to assure, in case of an accident, that radioactive cloud information reaches the ACCs in a timely manner, the ICAO is updating a global list of eight-letter ACC AFTN addresses. Some addresses for the Asia/Pacific Region have already been provided in response to a State letter issued 6 August 2009 (Ref.: T4/9.3:AP-MET0051/09), however, many are still unknown. Therefore, you are requested to provide the ACC AFTN address(es) in the attachment as soon as practicable, but not later than **1 February 2010**.

Yours sincerely,

Mokhtar A. Awan
Regional Director
