SMS Implementation Plan - acceptable means of compliance & guidance material

Reference should be made to [AC100-1 Section 3 Implementing an SMS](#)

Section 3.1.2 is provided below on this form as a summary for the content of the plan

AC100-1 Section 3.1.2 Implementation plan

Content of the Plan

The implementation plan is a roadmap describing how the organisation intends to implement processes that meet the requirements of Part 100 and associated organisation certification rules. Therefore, the implementation plan should be a strategy for managing SMS implementation including adequate resourcing and realistic timeline. Like any business change, SMS implementation will require some level of investment to address training, documentation changes, development time and possibly system tools to manage data streams and assist with analysis. The changes that are necessary to implement SMS should be managed in a structured way to ensure that there is an awareness of impacts and potential consequences, and that these are managed appropriately.

The implementation plan need not be complex. However, there should be sufficient detail to ensure that the organisation has identified how it will meet the overall objective of successfully implementing a SMS. This means that each element is present and suitable in the context of the activities the organisation undertakes.

The implementation plan should be developed in consultation with the chief executive and individuals who are responsible for functions within the organisation. Application Form CAA 24100/01 includes a declaration by the chief executive that the plan is appropriate, achievable, and adequately resourced in addition to a proposed date for implementation.

The implementation plan should be documented in a format that is appropriate to the content and complexity, and should address the following—

- the tasks identified during the gap analysis process, consistent with the requirements of the size of the organisation and the complexity of its products or services
- timelines and milestones for each task or group of tasks from the planning stage, to the entire implementation of SMS
- for a phased implementation approach (e.g. ICAO Doc. 9859, Chapter 5 – Phased Implementation Approach), the tasks are sorted according to the phase allocation of their related elements
- information as to who is responsible for completion of the identified task or group of tasks, including overall governance for the implementation plan
- a process identified whereby the status and performance of the SMS implementation plan is regularly monitored, and steps taken to mitigate substandard performance
- information showing how coordination of integrating safety related third party contractors and suppliers without an SMS, into the scope of the organisation's SMS
- resource requirements
- risk management associated with implementation of SMS.

SMS Implementation Plan and Date for Implementation Timeline

Аюулгүй байдлын удирдлагын тогтолцооны хэрэгжүүлэлтийн төлөвлөгөө ба хугацаа

Considerations when setting Date for Implementation as part of approval of the organisation's Implementation Plan:

- the capability of the organisation
- the complexity of the organisation
- the risks inherent in the activities of the organisation
- the date of any certificate renewal
- any resource or scheduling impacts on the organisation or the Authority or both
- the date for implementation must not be later than 1.Feb.2022.
- SMS implementation plan submission date:
 - 1.Apr.2021 for Group 1;
 - 1.Jul.2021 for Group 2.
