

PART-119 SENIOR PERSONS REQUIREMENT

AIRLINE AIR OPERATOR

GENERAL AVIATION AIR OPERATOR

Senior Persons responsible for	Criteria	Part 125		Part 135			
		Part 121	Multi-crew	Single pilot	Greater than 3 a/c or greater than 2 bases	Less than 4 a/c and less than 3 bases	
Flying operations, including the flight operations and the supporting ground operations Part 119 App.A.1	Doc. required	ATPL	ATPL	CPL, with Instrument Rating if operations include IFR	CPL, with Instrument Rating if operations include IFR		
	PIC experience	3 years as PIC under Part 121 operations	3 years as PIC under Part 121, Part 125 or Part 135 operations; or ↓		3 years as PIC under Part 135 operations and 750 h flight time during air operations on the same category of a/c to be operated, with experience in the same or similar type of air operation to be performed that is acceptable to the DG; and 75 h actual or simulated instrument time if operations include IFR; or ↓	500 h flight time during air operations on the same category of a/c to be operated, with experience in the same or similar type of air operation to be performed that is acceptable to the DG; and 75 h actual or simulated instrument time if operations include IFR; or ↓	
	Managerial experience	3 years in an operational control position	3 years in an operational control position		3 years in an operational control position with experience, including flight experience, appropriate to the type of air operation to be performed that is acceptable to the DG.	2 years in an operational control position with experience, including flight experience, appropriate to the type of air operation to be performed that is acceptable to the DG	
Crew training and competency assessment Part 119 App.A.2	Doc. required	ATPL with ratings	ATPL with ratings	CPL, with Instrument Rating if operations include IFR	CPL, with Instrument Rating if operations include IFR		
	PIC experience	Current to act as PIC of one type of operator's a/c	Current to act as PIC of one type of operator's a/c		Current to act as PIC of one type of operator's a/c		
	Managerial experience	3 years as PIC under Part 121, Part 125, or Part 135 operations and 2 years experience in the check and training role and the person responsible for flight crew training program must hold a current flight examiner rating (121.553(f), 121.603(d))	3 years as PIC under Part 121, Part 125, or Part 135 operations and 2 years experience in the check and training role and the person responsible for flight crew training program must hold a current flight examiner rating (125.553(f), 121.603(e))		3 years as PIC under Part 135 operations and 2 years experience in the check and training role	Not applicable	
Control and direction of maintenance Part 119 App.A.3	Doc. required	(1) must— (i) hold or have held an a/c maintenance engineer licence or equivalent, acceptable to the DG, with appropriate ratings; and (ii) have at least 5 years' experience in the maintenance of a/c of a similar size and type as that to be operated by the organisation; and (iii) have at least 2 years' experience in a supervisory position which may be undertaken during the 5 years' experience required under subparagraph (1)(ii); or (2) must—	(1) must meet the requirements of Part 121; or (2) must—	(1) must meet the requirements of Part 121; or (2) must—	(1) meet the requirements of Part 121 or (2) meet the requirements of Part 125; or (3) for organisations intending to conduct or conducting air operations with a total of three or less a/c listed on their operations specifications and from a total of two or less bases, have sufficient knowledge of maintenance to be able to ensure that the a/c is maintained in an airworthy condition and that any maintenance required by its maintenance programme is satisfactorily accomplished. The knowledge requirements in paragraph (3) may be met through a course of instruction acceptable to the DG and conducted under the authority of a training organisation certificate granted under the Act and i.a.w Part 141 or Part 147.		
	Maintenance experience	(i) be a graduate engineer or equivalent in an aeronautical, mechanical or electrical discipline; and (ii) have at least 5 years' experience of the maintenance of a/c, which may be gained while working in a maintenance supervision, maintenance planning, engineering development, or workshop environment; and (iii) have at least six months practical experience in a/c maintenance tasks which may be undertaken during the 5 years' experience required under subparagraph (2)(ii); and (iv) have at least 2 years' experience in a supervisory position which may be undertaken during the 5 years' experience required under subparagraph (2)(ii).	(i) hold or have held an a/c maintenance engineer licence granted under the Act and i.a.w Part 66, or an equivalent licence acceptable to the DG, with appropriate ratings; and (ii) have at least 3 years' experience performing maintenance on a/c of a similar size and type as that to be operated by the organisation; and (iii) have at least 1 years' experience certifying a/c for release-to- service, which may be undertaken during the 3 years' experience required under subparagraph (ii); or (3) must have experience acceptable to the DG including at least 5 years' experience responsible for the control and direction of maintenance and the continuing airworthiness of a/c of a similar size and type as that to be operated by the organisation.	(1) meet the requirements of Part 121; or (2) meet the requirements of Part 125; or (3) for organisations intending to conduct or conducting air operations with a total of three or less a/c listed on their operations specifications and from a total of two or less bases, have sufficient knowledge of maintenance to be able to ensure that the a/c is maintained in an airworthy condition and that any maintenance required by its maintenance programme is satisfactorily accomplished. The knowledge requirements in paragraph (3) may be met through a course of instruction acceptable to the DG and conducted under the authority of a training organisation certificate granted under the Act and i.a.w Part 141 or Part 147.			
	Managerial experience	The experience requirements in paragraphs (1)(ii) and (2)(ii) may be met through a course of instruction acceptable to the DG and conducted under the authority of a training organisation certificate granted under the Act and i.a.w Part 141 or Part 147 .	The experience requirement specified in paragraph (2)(ii) may alternatively be met through a course of instruction acceptable to the DG and conducted under the authority of a training organisation certificate granted under the Act and i.a.w Part 141 or Part 147			Greater than 3 a/c or greater than 2 bases	Less than 4 a/c and less than 3 bases
Airline AOC - Internal QA / GA AOC - Organisational management system (OMS) Part 119 App.A.5	Experience	5 years' experience in aviation with flight operations or maintenance background				3 years' experience in aviation with flight operations or maintenance background	
	Doc. required	Certificate in Quality Assurance or equivalent qualification; or 5 years' experience in quality assurance management in the aviation industry				Certificate in Quality Assurance (QA) or equivalent qualification; or ↓ General knowledge and awareness of QA or OMS; or ↓ 2 years' experience in management systems in the aviation industry	
SMS i.a.w 119.79 and 119.124 Part 119 App.A.4	Competency & Experience	Demonstrate competency relevant to systems for safety management. A working knowledge of the applicable CARs and safety management requirements. Experience and background relevant to the management of safety systems and the activities of the organisation.					
Accident and incident investigations i.a.w Part 12 Part 119.51/101(b)(1)(vi)	Competency & Experience	Demonstrate competency relevant to aircraft accident and incident investigation and A working knowledge of the applicable CARs and accident and incident investigation management requirements. Experience and background relevant to the management of aircraft accident investigation and the activities of the organisation must be acceptable to the DG.					
Air operator security Part 119.51(b)(1)(v)	Competency & Experience	Demonstrate competency relevant to systems for airline security management. A working knowledge of the applicable CARs and security management requirements. Experience and background relevant to the management of aviation security and the activities of the organisation must be acceptable to the DG.				Not applicable for GA AOC holder	

Note:
After the implementation of SMS by 1 February 2022, Internal Quality Assurance and Organisational Management Systems will be discontinued
